RESEARCHES ON POPULATION ECOLOGY

Volume 16

1974-1975

PUBLISHED BY

THE SOCIETY OF POPULATION ECOLOGY

c/o Japan Academic Societies Center
Yayoi 2-4-16, Bunkyo-ku, Tokyo 113, JAPAN

CONTENTS

Banerjee, B.: Population dynamics of *Trigoniulus lumbricinus* (Gerst) (Diplopoda: Trigoniulidae) ····· 132

Bryant, E. H. and A. E. Hall: The role of medium conditioning in the population dynamics of the housefly ····· 188

Erdman, H. E.: Productivity modifications to flour beetles (Coleoptera: Tenebrionidae) by gamma radiation (^{60}Co) of one or both sexes and by the addition of radiated males or females to population ····· 52

Fujisaki, K.: Breakup and re-formation of colony in the first-instar larvae of the winter cherry bug, *Acanthocoris sordidus* Thunberg (Hemiptera: Coreidae), in relation to the defence against their enemies ····· 252

Hokyo, N. and S. Kawauchi: The effect of prey size and prey density on the functional response, survival, growth and development of a predatory pentatomid bug, *Podisus maculiventris* Say ····· 207

Iwao, S.: A new method of sequential sampling to classify populations relative to a critical density ····· 281

Kobayashi, S.: The species-area relation II. A second model for continuous sampling ····· 265

Manly, B. F. J.: The estimation of the fitness function from two samples taken from a population ····· 219

Murai, M.: Studies on the interference among larvae of the citrus leaf miner, *Phyllocnistis citrella* Stainton (Lepidoptera: Phyllocnistidae) ····· 80

Murai, M.: On interference among larvae of the greasy cutworm, *Agrotis ypsilon* Rott. (Lepidoptera: Noctuidae) ····· 112

Murai, M.: Theoretical studies on the role of food exploitation for the competition of scramble type ····· 289

Nakamura, K., M. Nakamura, T. Matsumoto and Y. Itô: Fluctuations of grasshopper populations on a *Miscanthus sinensis* grassland ····· 198

Nakasuji, F., K. Kiritani and E. Tomida: A computor simulation of the epidemiology of the rice dwarf virus ····· 245

Okubo, A. and H. C. Chiang: An analysis of the kinematics of swarming of *Anarete pritchardi* Kim (Diptera: Cecidomyiidae) ····· 1

Poole, R. W.: Measuring the structural similarity of two communities composed of the same species ····· 138

Ryan, M. F.: The spatial distribution of the wheat-bulb fly, *Leptohylemyia coarctata* (Fall.) (Diptera: Anthomyiidae) ····· 127

Sasaba, T. and K. Kiritani: A systems model and computor simulation of the green rice leafhopper populations in control programmes ····· 231

Shiyomi, M.: An interpretation of aphid population development by statistical model ····· 69

TANADA, Y. and E. M. OMI: Epizootiology of virus diseases in three lepidopterous insect species of alfalfa 59
WHITE, E. G.: Identifying population units that comply with capture-recapture assumptions in an open community of alpine grasshoppers 153
WOLFENBARGER, D. O., J. A. CORNELL and D. A. WOLFENBARGER: Dispersal distances attained by insect populations of different densities 43
